

# MICROCHIP ID

"THE SCIENCE OF LABORATORY ANIMAL IDENTIFICATION"

## Desktop Reader

### LID1265

The LID1265 desktop reader can be used in applications that require a large reading distance and visual indication of the tag number.

This reader can use Trovan patented 3 coils antenna system as well as single coil sensor antenna (ANT610, ANT611A and ANT613). The housing is made of ABS ensuring good durability during service.

A large 2 line LC Display is integrated. It is possible to assign custom names to the ID numbers via the accompanying software. The LCD has a backlight ensuring improved clarity of display.

Connection is via a RS232 communication port with the option of a USB interface. The unit can be used with either 110 or 220 volt power supply with the required adaptors.
